

CAPABILITY STATEMENT

COMPANY OVERVIEW

Bruce Environmental Inc is a family owned and operated hazardous material remediation contractor established in 1993. Bruce Environmental Inc specializes in asbestos abatement, mold remediation, and RRP lead hazard removal. Operations cover the entire state of Georgia with service extending into bordering counties of Tennessee, Alabama, and South Carolina. Decades of field experience support safe, compliant project execution across healthcare, commercial, and public facilities.

BRUCE ENVIRONMENTAL, INC.

UEI: G31BB2UHC6D5
CAGE: 74UM2

1000 Shadix Industrial Way
Douglasville, GA 30134

CAPABILITIES

Bruce Environmental Inc provides full scope hazardous material remediation including asbestos surveys, asbestos abatement, mold assessments, mold remediation, lead surveys, and RRP remediation. Crews support regulated projects with OSHA Class III tie-backs and controlled hazardous material decontamination procedures. Recent healthcare work includes the removal and disposal of 1,800 square feet of asbestos floor tile and mastic within the BIO respiratory suite at Northside Hospital Atlanta, performed during night operations from September 24 to September 26, 2025, valued at \$35,280. Services emphasize compliance, containment, integrity, and safe project turnover.

CORE COMPETENCIES

- Asbestos Surveys
- Asbestos Abatement
- Mold Assessments
- Mold Remediation
- Lead Survey
- RRP Lead Hazard Remediation
- OSHA Class III Tie Backs
- Hazardous Material Decontamination

DIFFERENTIATORS

Bruce Environmental Inc brings 33 years of abatement experience with rapid 24 to 48 hour turnaround on asbestos and lead surveys. Seven dedicated field trucks operate seven days a week, each staffed with a certified supervisor and certified technicians trained across hazard disciplines. An industrial hygienist on staff supports regulatory compliance and quality control. Pending patents on specialized asbestos procedures further strengthen technical capability in complex remediation environments.

PAST PERFORMANCE

Hampton Restoration

Bruce Environmental Inc performed controlled cuts in asbestos-containing drywall using OSHA Class III tie back methods to allow HVAC register installation without rendering the material friable. Work was executed under regulated containment procedures to maintain material stability and protect adjacent areas. This targeted approach minimized disturbance, optimized overall abatement scope, reduced project cost, and shortened the project schedule while maintaining full regulatory compliance and safety standards.

- Contract ID: Judi Barrett-340-TBK
- Start Date: 11/13/25
- End Date: 11/13/25
- Value: \$11,124.49

Hampton Restoration

Bruce Environmental Inc provided removal and disposal of approximately 191 square feet of asbestos-containing sheetrock ceiling materials and associated insulation within a basement kitchenette under regulated containment conditions. Services also included removal and disposal of approximately 191 square feet of asbestos-containing floor tile and mastic adhered to the slab in the same area. All work was completed in accordance with applicable federal and state asbestos regulations, with proper containment, waste handling, and site clearance procedures.

- Contract ID: Lee Whitfield-841-ASB
- Start Date: 02/16/26
- End Date: 02/16/26
- Value: \$8,268

State Farm Insurance

Bruce Environmental Inc provided removal and disposal of approximately 799 square feet of asbestos-containing floor tile and black asbestos mastic adhered to a concrete slab across multiple basement rooms. Work included regulated containment setup, controlled removal methods to prevent fiber release, and proper packaging, transport, and disposal of asbestos waste in accordance with applicable requirements.

- Contract ID: Fred Collier-836-ASB
- Start Date: 01/01/26
